TECHNICAL MANUAL

TROUBLESHOOTING

OPERATOR LEVEL

2½-TON, 6x6, M44A1 AND M44A2 SERIES TRUCKS (MULTIFUEL)

TRUCK, CARGO: M35A1,
M35A2, M35A2C, M36A2; TRUCK,
TANK, FUEL: M49A1C, M49A2C; TRUCK, TANK,
WATER: M50A1, M50A2, M50A3; TRUCK, VAN,
SHOP: M109A2, M109A3; TRUCK, REPAIR SHOP:
M185A2, M185A3; TRUCK, TRACTOR: M275A1,
M275A2; TRUCK, DUMP: M342A2; TRUCK,
MAINTENANCE, PIPELINE CONSTRUCTION:
M756A2; TRUCK, MAINTENANCE,
EARTH BORING AND POLESETTING: M764

WARNING

EXHAUST GASES CAN BE DEADLY

Exposure to exhaust gases produces symptoms of headache, dizziness, loss of muscular control, apparent drowsiness, and coma. Permanent brain damage or death can result from severe exposure.

Carbon monoxide occurs in the exhaust fumes of fuel burning heaters and internal combustion engines, and becomes dangerously concentrated under conditions of inadequate ventilation. The following precautions must be observed to insure the safety of personnel whenever fuel burning heater(s) or engine of any vehicle is operated for maintenance purposes or tactical use.

Do not operate heater or engine of vehicle in an enclosed area unless it is adequately ventilated.

Do not idle engine for long periods without maintaining adequate ventilation in personnel compartments.

Do not drive any vehicle with inspection plates or cover plates removed unless necessary for maintenance purposes.

Be alert at all times during vehicle operation for exhaust odors and exposure symptoms. If either are present, immediately ventilate personnel compartments. If symptoms persist, remove affected personnel from vehicle and treat as follows: expose to fresh air; keep warm; do not permit physical exercise; if necessary, administer artificial respiration.

If exposed, seek prompt medical attention for possible delayed onset of acute lung congestion. Administer oxygen if available.

The best defense against exhaust gas poisoning is adequate ventilation.

WARNING

Serious or fatal injury to personnel may result if the following instructions are not complied with.

Use extreme care when removing radiator cap, especially when temperature gage shows above 180°F.

Always wear leather gloves when handling winch cable. Never allow cable to slip through hands. Do not operate winch with less than four turns of cable on drum.

Do not drive truck until the low air pressure warning buzzer is silent and the air pressure gage shows at least 65 PSI. This is the minimum pressure required for safe braking action.

Do not use hand throttle to drive the vehicle.

Do not park truck with front transmission gearshift lever in gear.

If your vehicle class number is greater than the bridge class number, do not cross.

TECHNICAL MANUAL NO. 9-2320-209-10-3 TECHNICAL ORDER NO. 36A12-1B-1091-3

DEPARTMENTS OF THE ARMY AND THE AIR FORCE Washington, DC, 26 September 1980

CHAPTER 1 GENERAL INFORMATION

- 1-1. SCOPE. This volume tells you how to do troubleshooting at the operator's level of maintenance. The amount of troubleshooting you can do is based on what the Maintenance Allocation Chart says you can fix. Because of this, the only trouble symptoms you will find here are those that could be caused by faulty things you can fix.
- 1-2. ORGANIZATION. When you do PMCS, or when you drive the truck and find that something is wrong, write down what is wrong. Then check the fault symptom index to see if the trouble (fault symptom) you noted is in the index. If it is, you can do troubleshooting to find the fault and fix it. If the symptom is not in the index, tell organizational maintenance.
- 1-3. TROUBLESHOOTING APPROACH. In order to find out what is causing the problem in the truck, you must use a good approach. A good approach just means a way of doing troubleshooting so you can find the problem and not get confused or lost. The following chapter describes how you can use the materials in this volume to troubleshoot with a good approach.

CHAPTER 2

TROUBLESHOOTING APPROACH

- 2-1. GENERAL APPROACH. This chapter gives you instructions on how to use the troubleshooting material to help you find and fix the trouble. In every system of the truck there can be faults or problems which will cause certain symptoms. Symptoms can be such things as unusual noise, vibration, or even complete failure of a system. This volume gives information for each system on which you can do troubleshooting to find faults and fix them. Before you troubleshoot a system, you should look at the troubleshooting indexes which will lead you to the information you need to help make your troubleshooting faster and easier. If you follow the instructions the right way, you will find those troubles you can fix. But, if you fix something and the trouble is still there, it means there is more than one trouble. If this happens, start all over again to find the other trouble.
- 2-2. TROUBLESHOOTING INDEX. The troubleshooting index, and instructions on how to use it are in chapter 3. Go to this index first because it tells you where to find troubleshooting roadmaps, fault symptom indexes, summary troubleshooting charts and support diagrams for each system.
- 2-3. TROUBLESHOOTING ROADMAPS. Troubleshooting roadmaps for each system are in chapter 5. If the system is made up of subsystems, these subsystems are also on the roadmap. Under the subsystem is a list of things which are the most likely causes of a fault symptom in that subsystem. If you have enough skill, you can troubleshoot these things on the truck without using the detailed troubleshooting procedures. So if you know enough about the truck to work on your own, use the roadmap for the system with the problem before you check the fault symptom index.
- 2-4. FAULT SYMPTOM INDEX. Fault symptom indexes and instructions on how to use them are in chapter 6. For each system of the truck, there is an index which gives you a list of the fault symptoms for that system. The index also tells you where to find the detailed troubleshooting procedures and what resources (tools/people) you need to do each procedure.
- 2-5. SAMPLE TROUBLESHOOTING PROCEDURE. A sample troubleshooting procedure is in chapter 7. This sample procedure will help you see the way detailed troubleshooting procedures are to be used.

CHAPTER 3

TROUBLESHOOTING INDEX

- $^{3-1}\cdot$ GENERAL. This chapter has a troubleshooting index which covers every system of the truck on which you can do troubleshooting. The index tells you where to find all the other information you need to do your troubleshooting procedures.
- 3-2. INDEX. The troubleshooting index (fig. 3-1) is divided into five columns that list systems, troubleshooting roadmaps, fault symptoms, summary troubleshooting procedures, and system support diagrams. The following breakdown tells you what is in each column.
- a. <u>System Column</u>. This column gives a list of systems on the truck for which troubleshooting can be done at the operator's maintenance level.
- b. <u>Troubleshooting Roadmaps Column</u>. This column tells you where to find the troubleshooting roadmap for each listed system. These roadmaps are given in chapter 5.
- c. <u>Fault Symptom Index Column</u>. This column tells you where to find the troubleshooting fault symptom index for each listed system. Fault symptom indexes are given in chapter 6.
- d. Summary Troubleshooting Procedures Column. Summary troubleshooting procedures are not needed at this level of maintenance because they would be the same as the detailed troubleshooting procedures, so this column is not used. The detailed troubleshooting procedures found by using the fault symptom indexes will get you to the cause of the trouble quickly.
- e. <u>System Support Diagrams Column</u>. The detailed troubleshooting procedures in this volume will give you all the information you need to find the bad part or problem with the truck. So, because support diagrams are not needed, this column is not used.

TM 9-2320-209-10-3

Figure 3-1. Troubleshooting Index

CHAPTER 4

TEST EQUIPMENT PROCEDURES INDEX

4-1. INDEX. There is no test equipment needed at the operator maintenance level to do troubleshooting, so, no test equipment procedures index is given.

CHAPTER 5

TROUBLESHOOTING ROADMAPS

- 5-1. GENERAL. This chapter gives troubleshooting roadmaps for every system of the truck for which you have detailed troubleshooting procedures. Figures 5-1 through 5-15 cover all the roadmaps for the detailed procedures.
- 5-2. ROADMAPS . Each roadmap gives a list of things which are most likely to cause a fault symptom in a system or subsystem. At least one of the items listed will be found to be bad when you do the detailed troubleshooting procedures for that system.

CHAPTER 6

FAULT, SYMPTOM INDEXES

- 6-1. GENERAL. This chapter gives troubleshooting fault symptom indexes for every system of the truck for which you have detailed troubleshooting procedures. These indexes are in table form (tables 6-1 through 6- 15) which gives you a quick way to check what material you have to use to do your troubleshooting.
- 6-2. INDEXES. Each index is divided into columns which give you information you need to help you do troubleshooting procedures. The following breakdown tells you what is in each column.
- a. <u>Subsystem Column.</u> If the main system is divided into subsystems, the subsystems will be listed in this column.
- b. <u>Symptom Column</u>. This column lists the symptoms, or problems for which detailed troubleshooting procedures are given.
- c. <u>Summary Column</u>. No summary troubleshooting procedures are needed at the operator's level of troubleshooting, so, the summary column is not used.
- d. <u>Detailed Column</u>. This column tells you where to find the detailed trouble-shooting procedure for each symptom.
- e. <u>Persons Column</u>. This column tells you how many people are needed to do the troubleshooting procedure.
- f. Special Tools Column. Any tools needed to do the troubleshooting procedure which are not included in your common tool kit are listed in this column.
- g. Standard Tools Column. A dot in this column means that tools found in your common tool kit are needed to do the troubleshooting procedure.
- h. <u>Materials Column</u>. This column tells you what materials are needed to do the troubleshooting procedure. These materials and how they will be issued will be decided by your maintenance officer.
- i. <u>Time Column</u>. This column tells you how much time you will need to do the detailed troubleshooting procedure. The time will be decided by your maintenance officer.

CHAPTER 7

SAMPLE TROUBLESHOOTING PROCEDURE

- 7-1. GENERAL. This chapter gives a sample troubleshooting procedure. The purpose of the sample procedure is to help you see how the detailed troubleshooting procedures are used to find faults in a system.
- 7-2. SAMPLE PROCEDURE. The sample procedure given is the fuel system trouble-shooting procedure for the symptom, ENGINE IS HARD STARTING, OR CRANKS AND DOES NOT START. This symptom is one you will have when you try to start your truck and certain parts on the truck are not working correctly. In each numbered box, instructions are given which tell you what to do, and how to do it. A large dot is placed next to the "what to do" instructions, and small dots next the the "how to do it" instructions.
- a. Box number 1 gives general instructions on getting the truck ready before you start to troubleshoot.
- b. Box number 2 gives a fault isolation test instruction. In this case, you are told to see if the engine stop (ENG STOP) control handle is pushed in. After you do this simple test, you read the question at the bottom of box number 2. If the ENG STOP control handle is pulled out, the answer to the question is NO, so you go to the next box.
- c. Box number 3 gives you a corrective action. In this case, the fault is the ENG STOP control handle being pulled out. The corrective action is what you do to fix the fault, which is simply to push the handle back in. If the engine still doesn't start after you do this, it could mean that there are other faults in the fuel system besides the ENG STOP control handle. When this happens, go back to the beginning of the procedure and do each step again until you find the other faults.
- d. Sometimes the corrective actions given for a fault will tell you what to do to fix the fault, but will not give you detailed instructions on how to fix it. Instead, you will be told to refer to another volume in this manual for these instructions. Box number 5 is an example of this. If the answer to the questions that all the fault isolation test instruction boxes ask is YES, it means that the symptom cannot be corrected at the operator level of maintenance. When this happens you are given the instruction "Tell Organizational Maintenance."

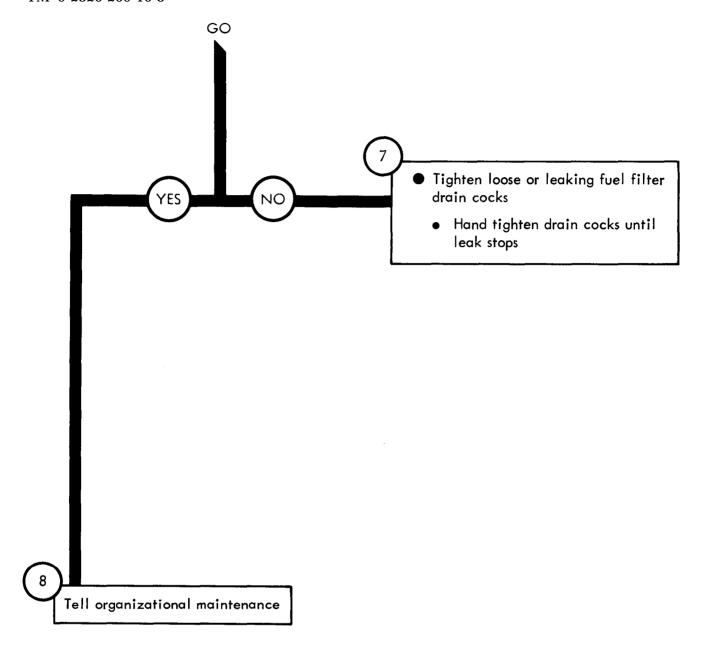

Figure 7-1 (Sheet 3 of 3)

CHAPTER 8 FUEL SYSTEM TROUBLESHOOTING PROCEDURES

- 8-1. GENERAL. Detailed troubleshooting procedures for the fuel system are given in this chapter.
- 8-2. PROCEDURES . These troubleshooting procedures are used the same way as the sample troubleshooting procedure given in chapter 7.

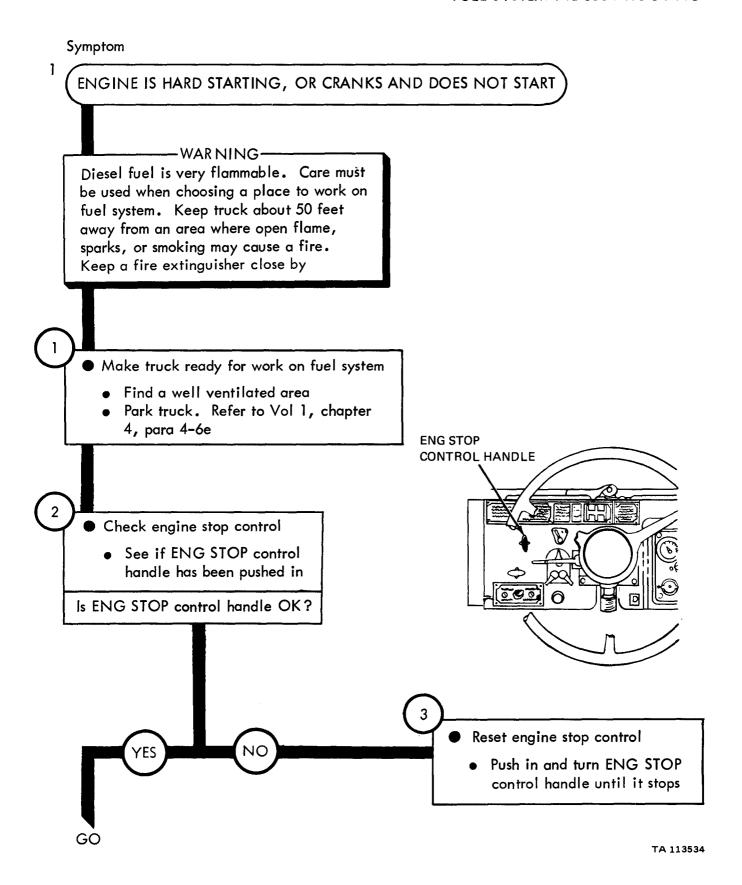

Figure 8-1 (Sheet 1 of 3)

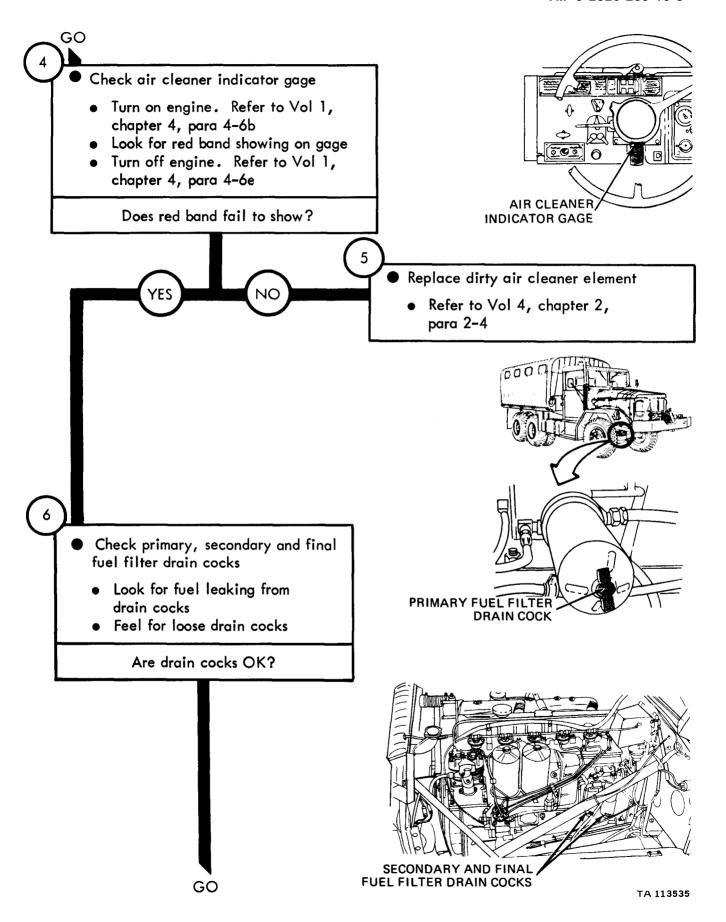

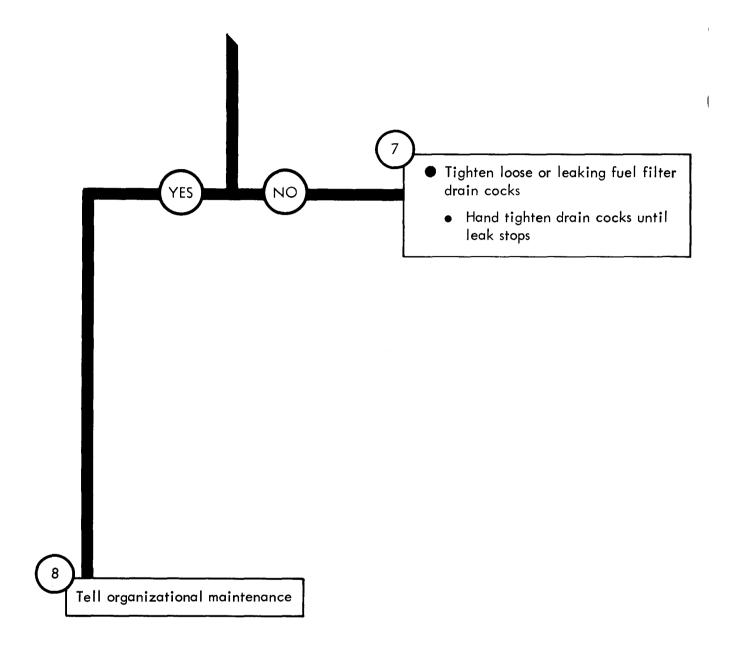

Figure 8-1 (Sheet 2 of 3)

Symptom

2 ENGINE RUNS ROUGH AND LACKS POWER, OR GETS POOR FUEL MILEAGE

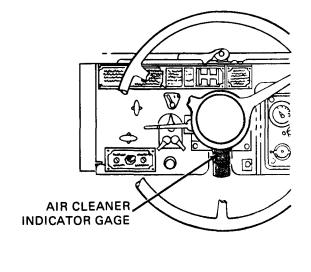

- WARNING -

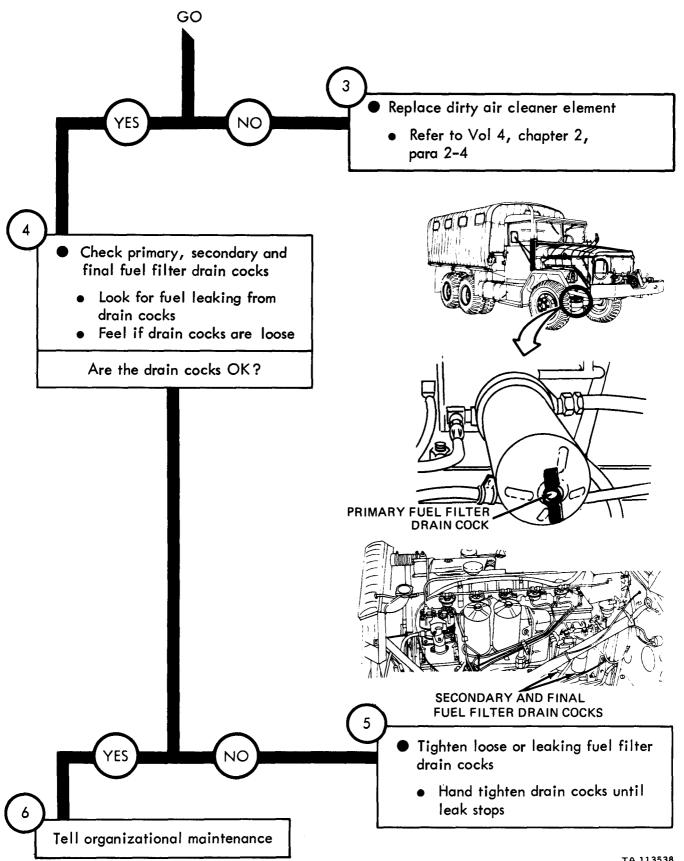

Diesel fuel is very flammable. Care must be used when choosing a place to work on fuel system. Keep truck about 50 feet away from an area where open flame, sparks, or smoking may cause a fire. Keep a fire extinguisher close by

- Make truck ready for work on fuel system
 - Find a well ventilated area
 - Park truck. Refer to Vol 1, chapter 4, para 4-6e
- Check air cleaner indicator gage
 - Turn on engine. Refer to Vol 1, chapter 4, para 4-6b
 - Look for red band showing on gage
 - Turn off engine. Refer to Vol 1, Chapter 4, para 4-6e

Is red band hidden?

GO

CHAPTER 9 COOLING SYSTEM TROUBLESHOOTING PROCEDURES

- 9-1. GENERAL. Detailed troubleshooting procedures for the cooling system are given in this chapter.
- 9-2. PROCEDURES. These troubleshooting procedures are used the same way as the sample troubleshooting procedure given in chapter 7.

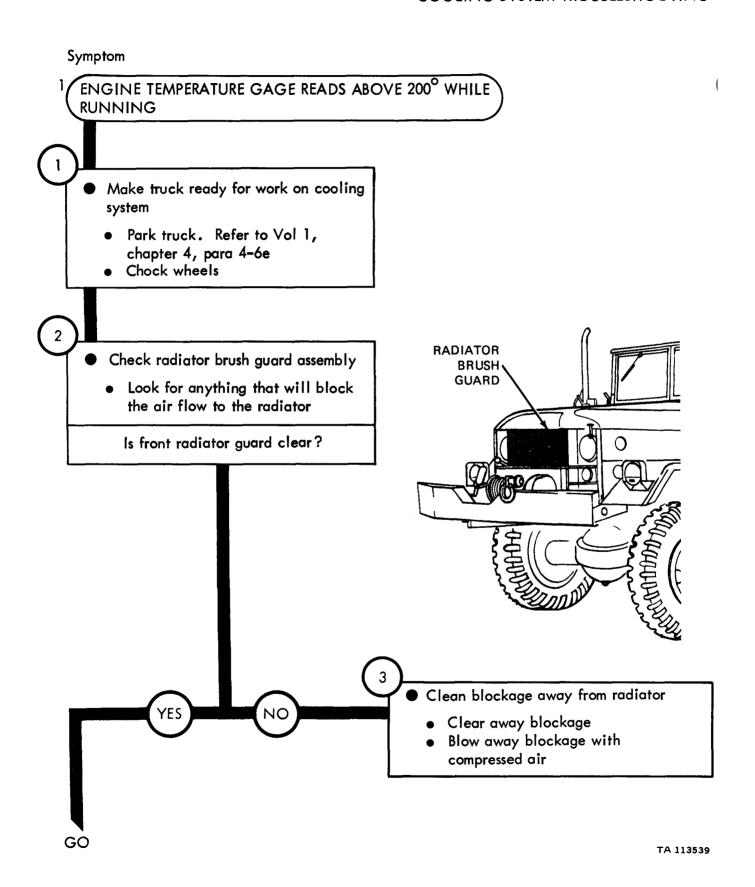

Figure 9-1 (Sheet 1 of 3)

GO WARNING-

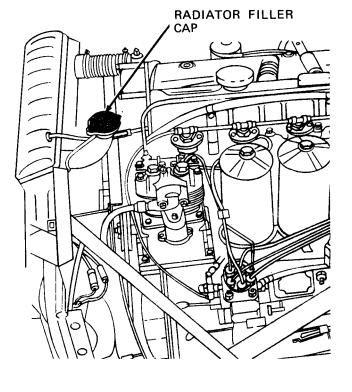

Engine cooling system runs under pressure, and at a temperature of 165°F, to 195°F. If filler cap is taken off before pressure is set free scalding coolant will blow out. Due to high temperature of coolant, bad burns can occur if contact is made with skin

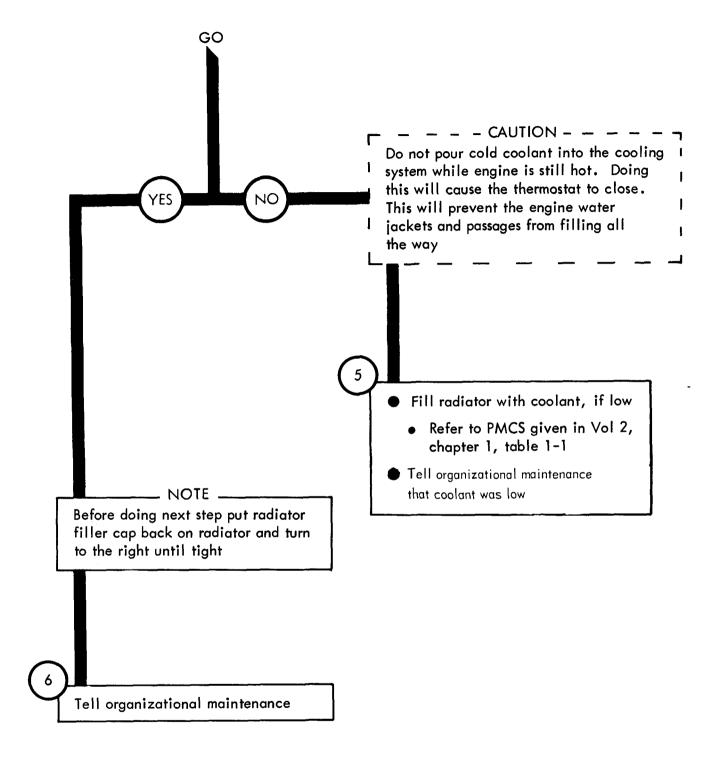

Check radiator coolant level

- Using rag, grab radiator filler cap and turn to the left until it reaches stop
- Wait about 30 seconds, or until all pressure has been set free
- Using rag, push down on cap and turn to left. Take off cap
- Look inside radiator and see if coolant level is within two inches from top

Is radiator coolant level OK?

GO

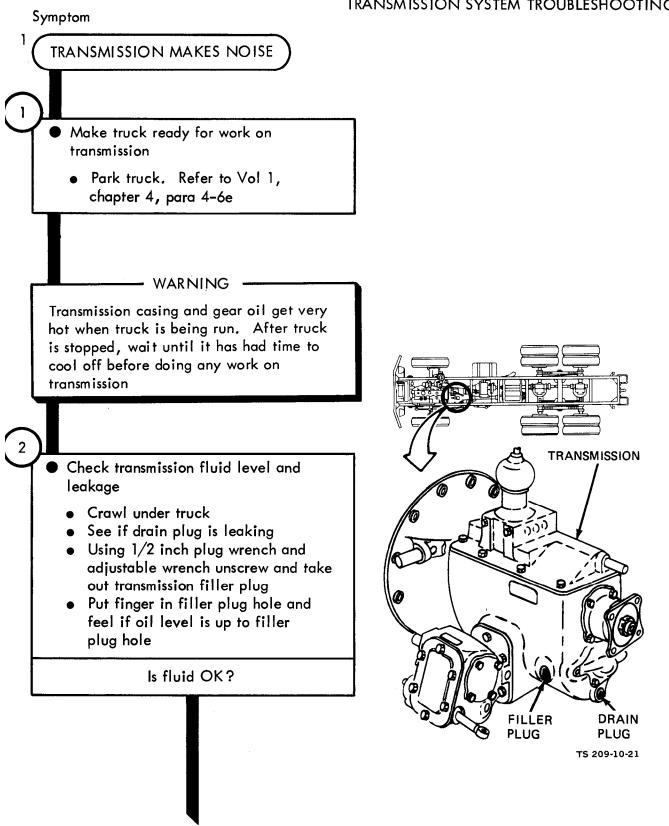

CHAPTER 10 TRANSMISSION SYSTEM TROUBLESHOOTING PROCEDURES

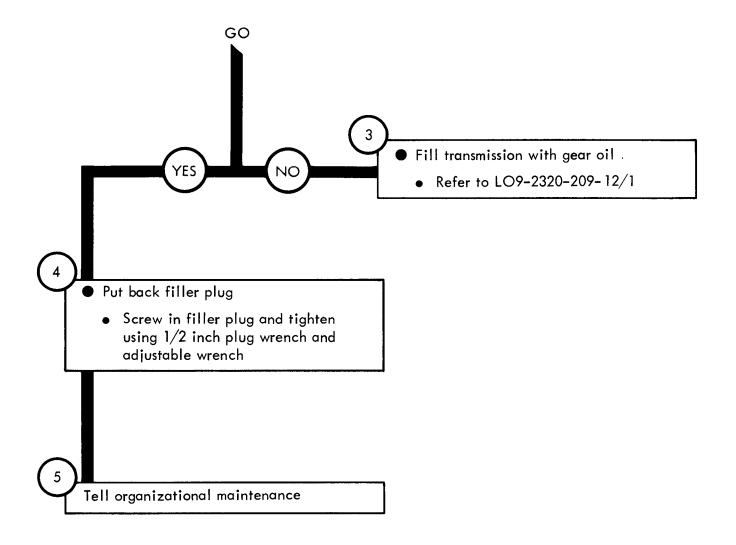

- 10-1. GENERAL. Detailed troubleshooting procedures for the transmission system are given in this chapter.
- 10-2. PROCEDURES. These troubleshooting procedures are used the same way as the sample troubleshooting procedure given in chapter 7.

CHAPTER 15 WHEEL SYSTEM TROUBLESHOOTING PROCEDURES

- 15-1. GENERAL. Detailed troubleshooting procedures for the wheel system are given in this chapter.
- 15-2. PROCEDURES. These troubleshooting procedures are used the same way as the sample troubleshooting procedure given in chapter 7.

WHEEL SYSTEM TROUBLESHOOTING

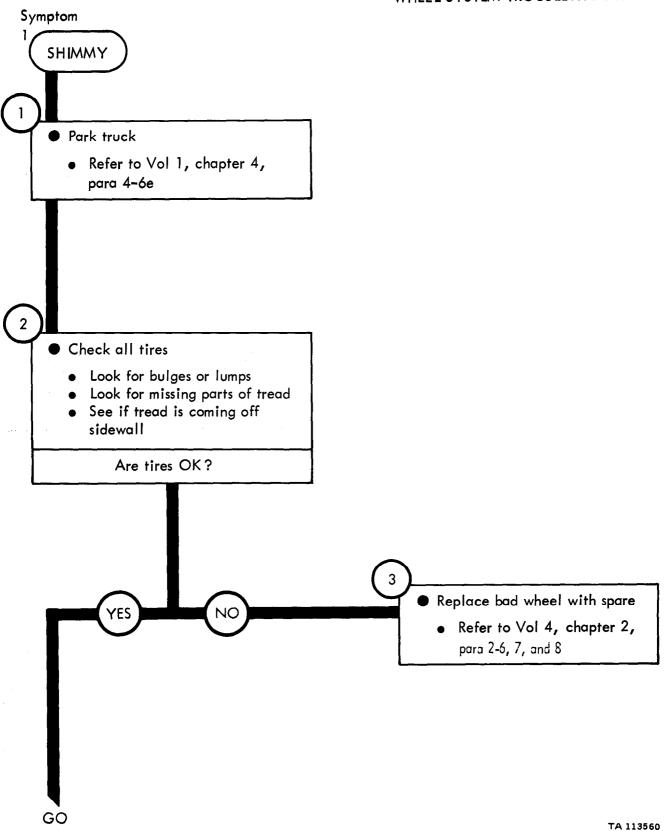

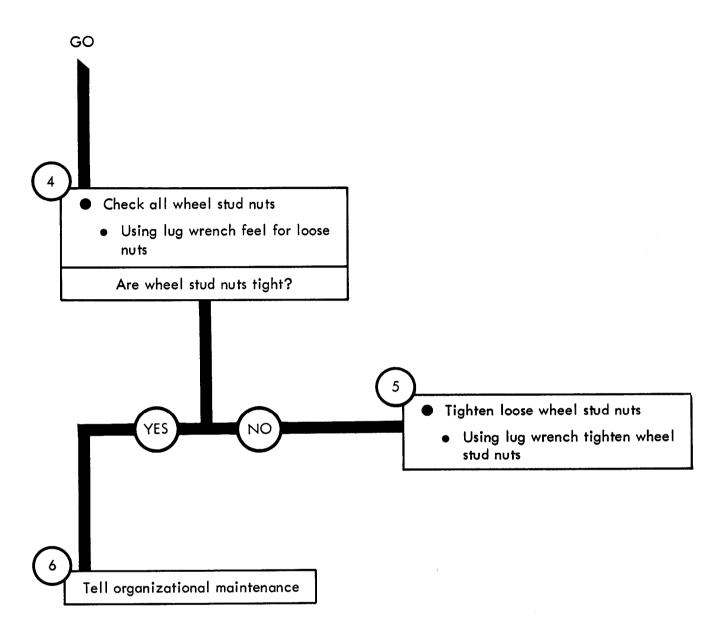

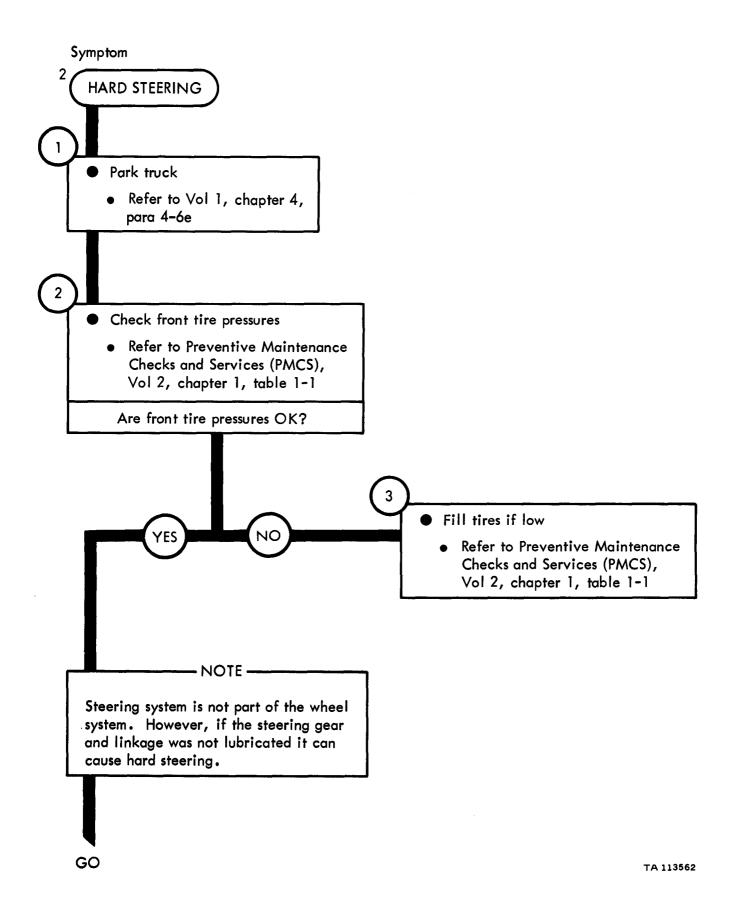

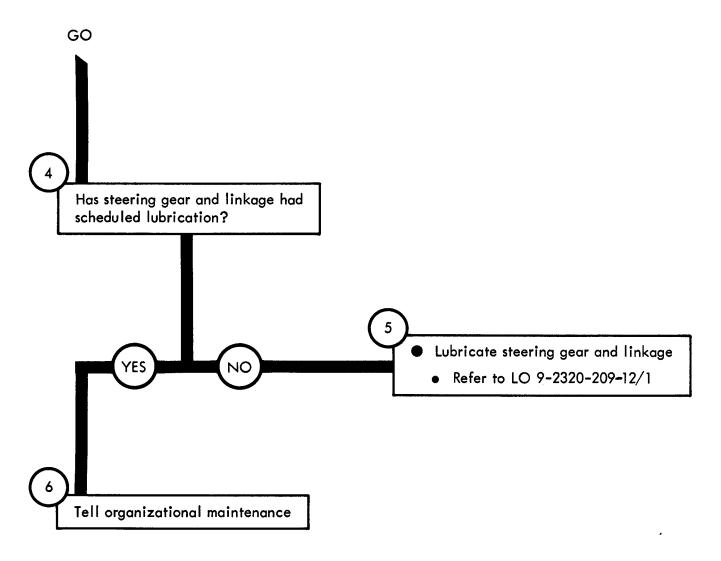

Figure 15-1 (Sheet 1 of 2)

CHAPTER 16 STEERING SYSTEM TROUBLESHOOTING PROCEDURES

- 16-1. GENERAL. Detailed troubleshooting procedures for the steering system are given in this chapter.
- 16-2. PROCEDURES . These troubleshooting procedures are used the same way as the sample troubleshooting procedure given in chapter 7.

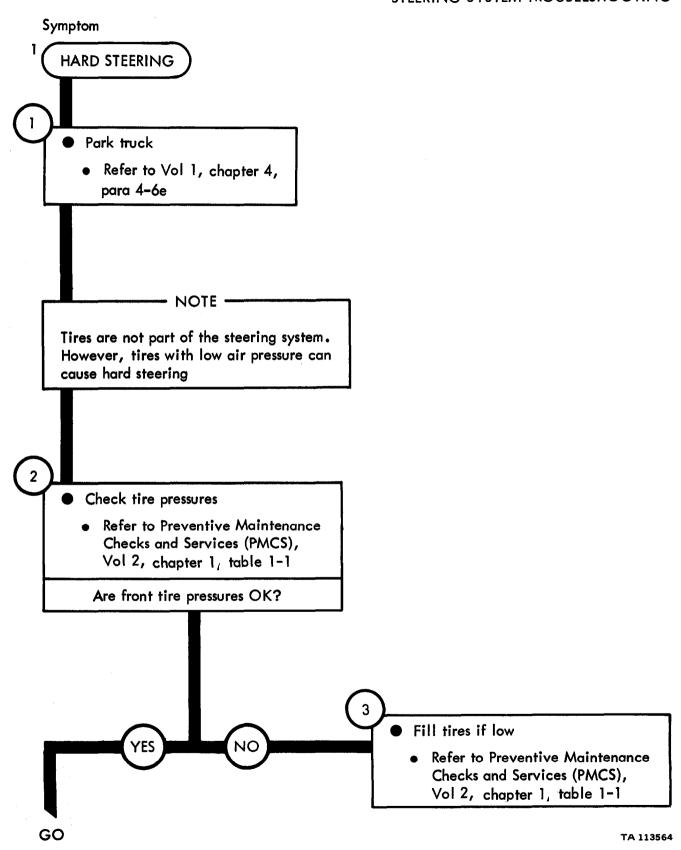

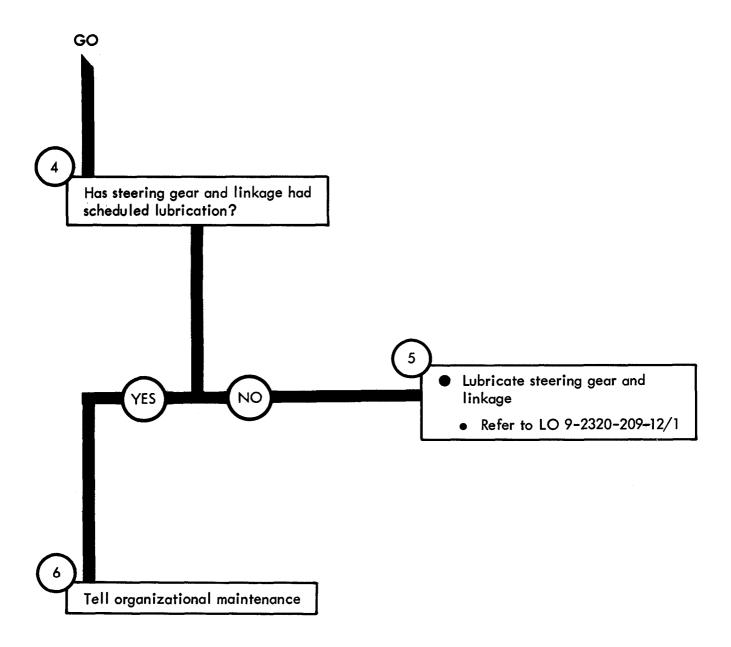

Figure 16-1 (Sheet 1 of 2)

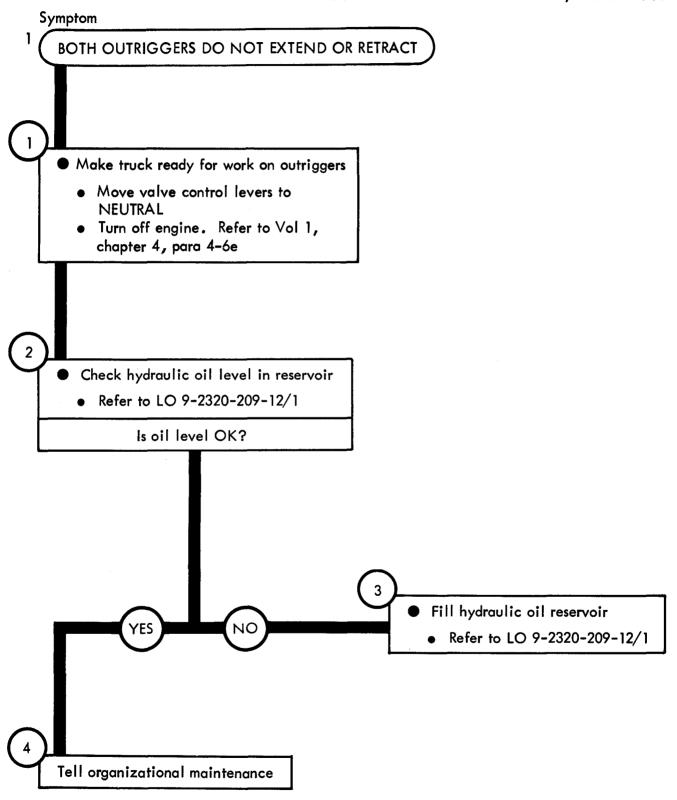

CHAPTER 17 OUTRIGGER TROUBLESHOOTING PROCEDURES, TRUCK M764

^{17-1.} GENERAL. Detailed troubleshooting procedures for the outrigger, truck M764 are given in this chapter.

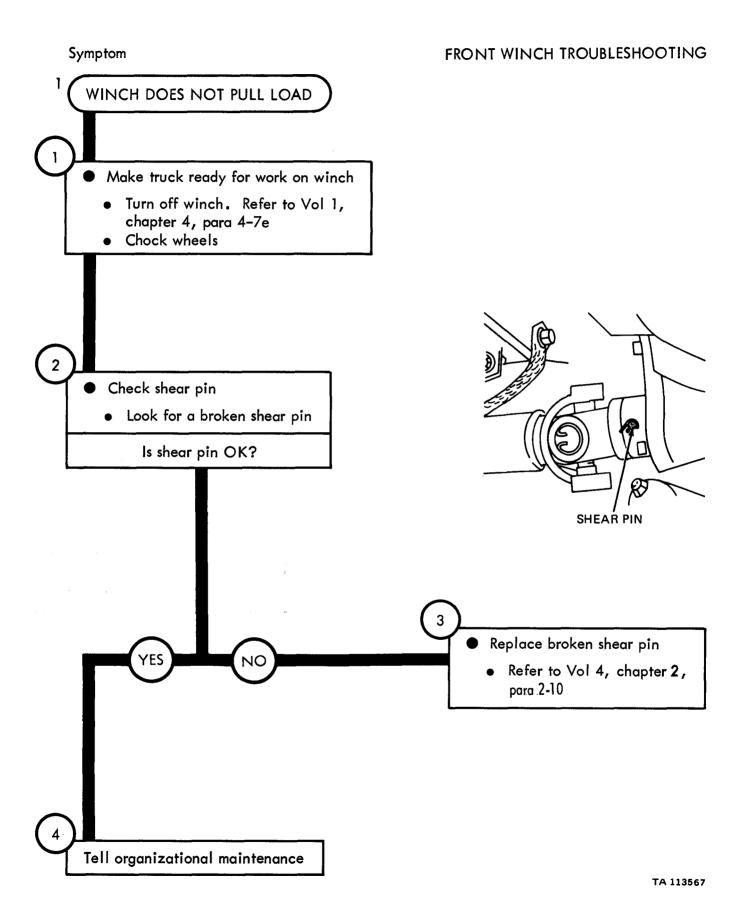

^{17-2.} PROCEDURES . These troubleshooting procedures are used the same way as the sample troubleshooting procedure given in chapter 7.

OUTRIGGER TROUBLESHOOTING, TRUCK M764

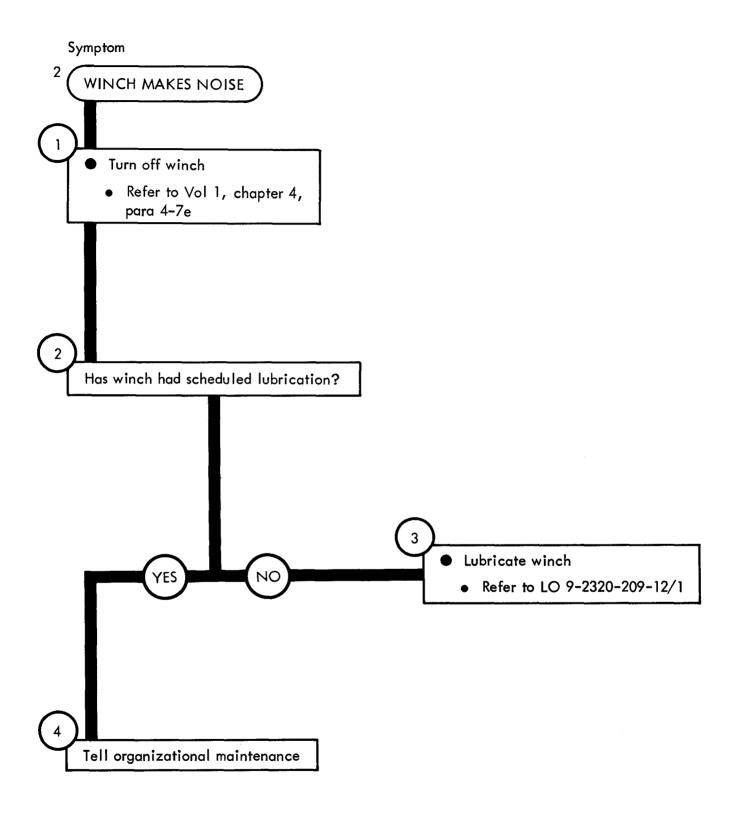

CHAPTER 18 FRONT WINCH TROUBLESHOOTING PROCEDURES

- 18-1. GENERAL. Detailed troubleshooting procedures for the front winch are given in this chapter.
- 18-2. PROCEDURES. These troubleshooting procedures are used the same way as the sample troubleshooting procedure given in chapter 7.

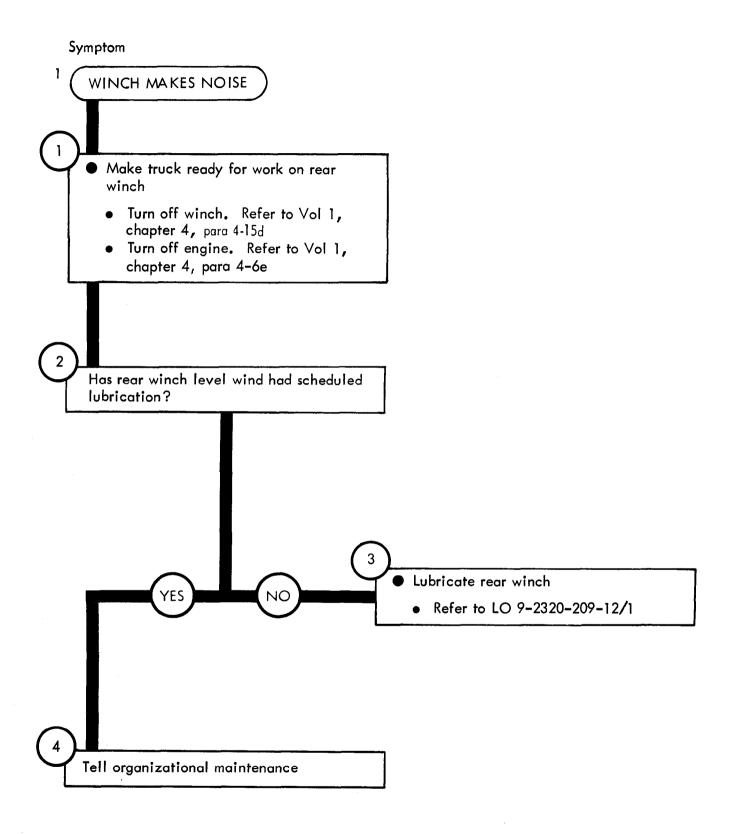

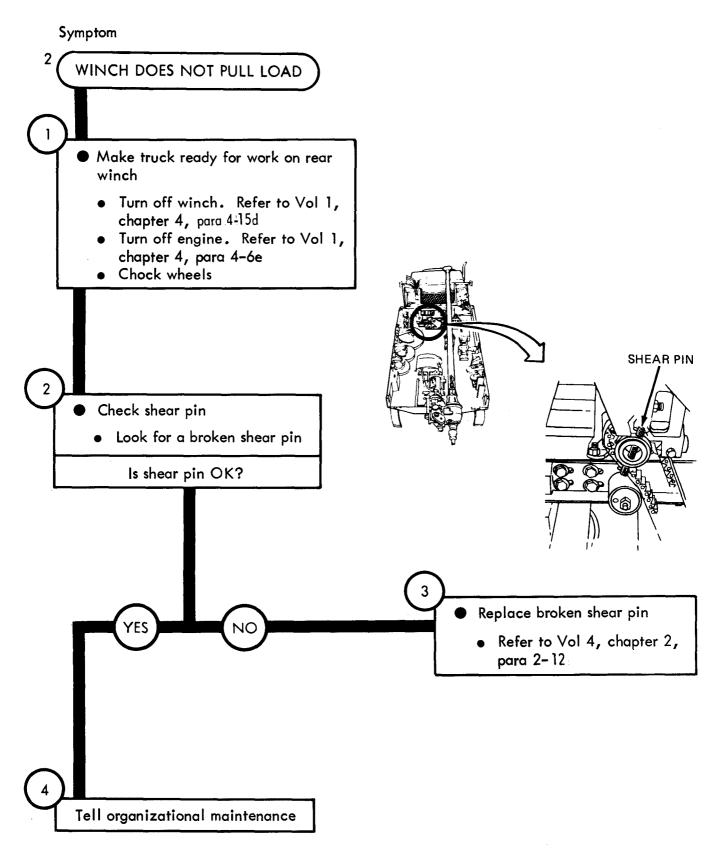

18-2

CHAPTER 19 REAR WINCH TROUBLESHOOTING PROCEDURES, TRUCK M764

- 19-1. GENERAL. Detailed troubleshooting procedures for the rear winch, truck M764 are given in this chapter.
- 19-2. PROCEDURES . These troubleshooting procedures are used the same way as the sample troubleshooting procedure given in chapter 7.

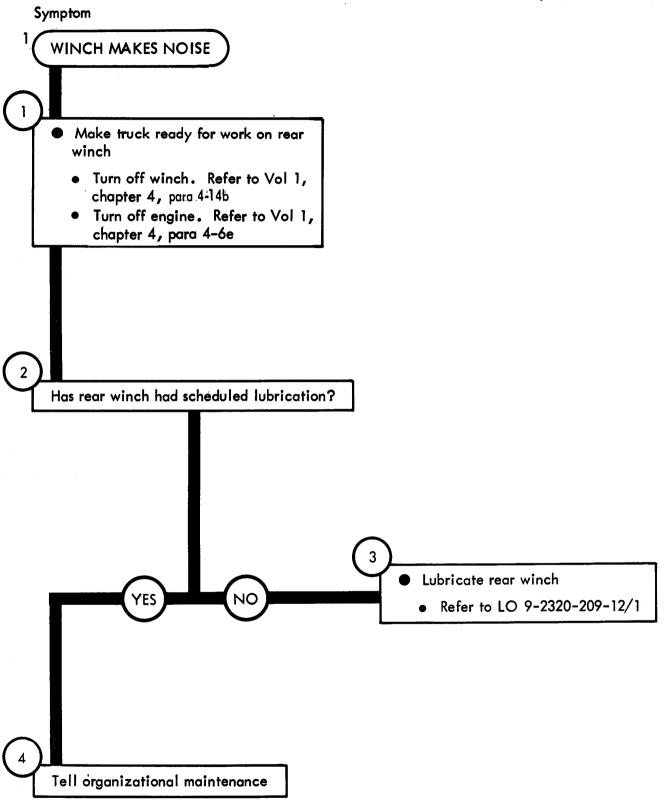

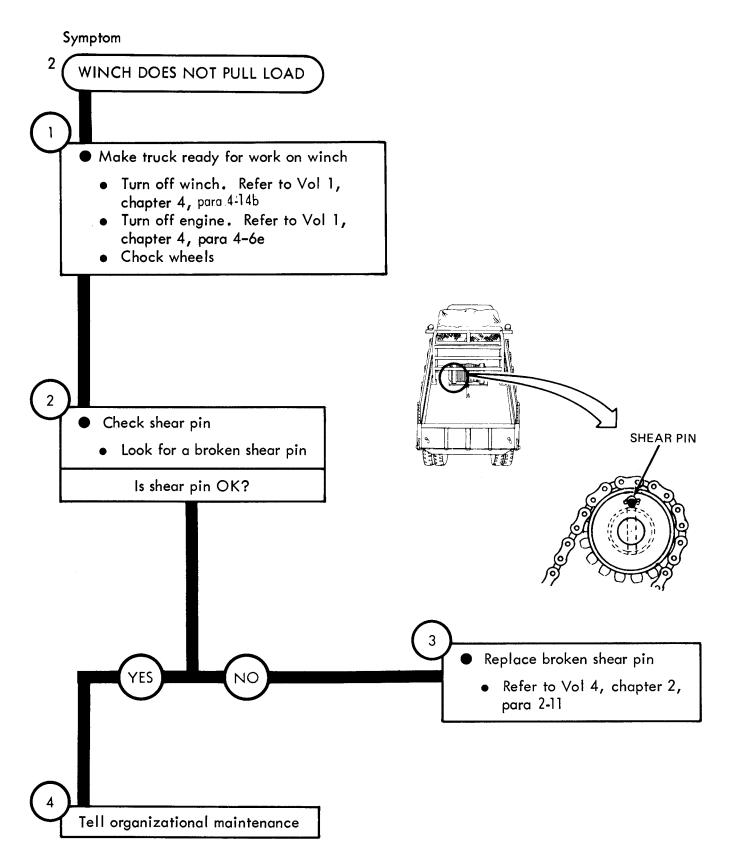

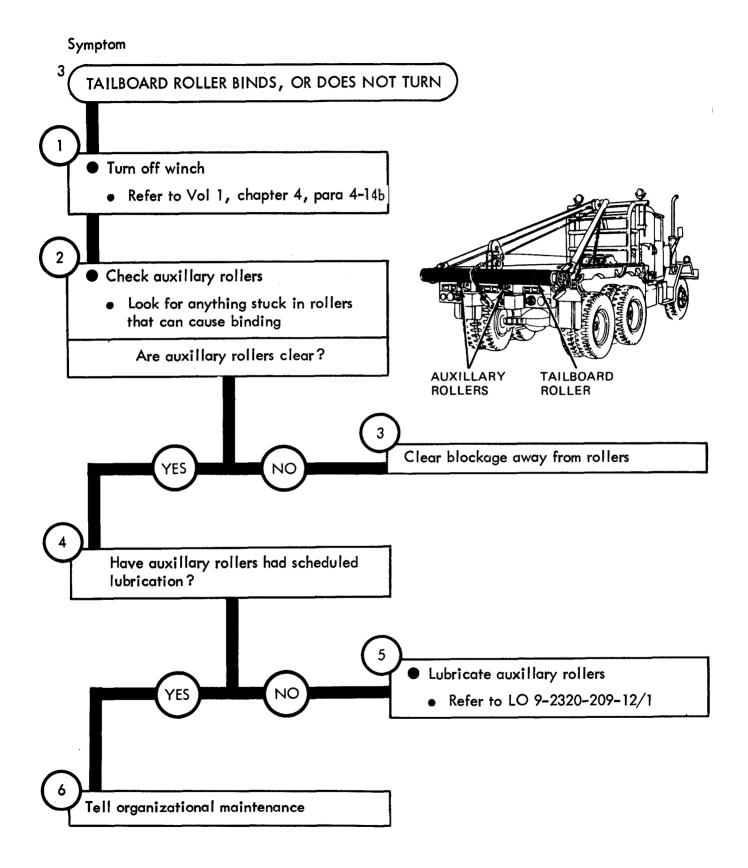

CHAPTER 20 REAR WINCH TROUBLESHOOTING PROCEDURES, TRUCK M756A2

- 20-1. GENERAL. Detailed troubleshooting procedures for the rear winch, truck M756A2 are given in this chapter.
- 20-2. PROCEDURES. These troubleshooting procedures are used the same way as the sample troubleshooting procedure given in chapter 7.

REAR WINCH TROUBLESHOOTING, TRUCK M756A2

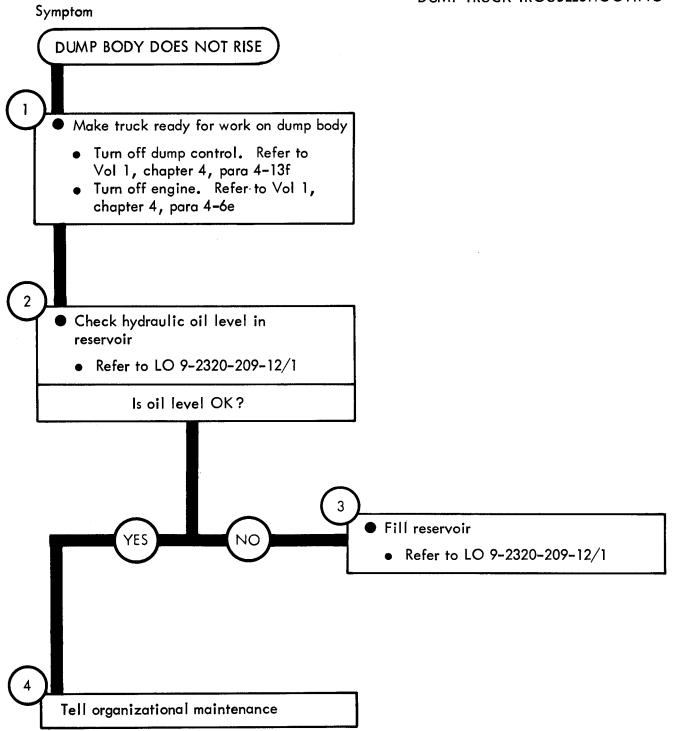

CHAPTER 21 DUMP TRUCK TROUBLESHOOTING PROCEDURES

- 21-1. GENERAL. Detailed troubleshooting procedures for the dump truck are given in this chapter.
- 21-2. PROCEDURES. These troubleshooting procedures are used the same way as the sample troubleshooting procedure given in chapter 7.

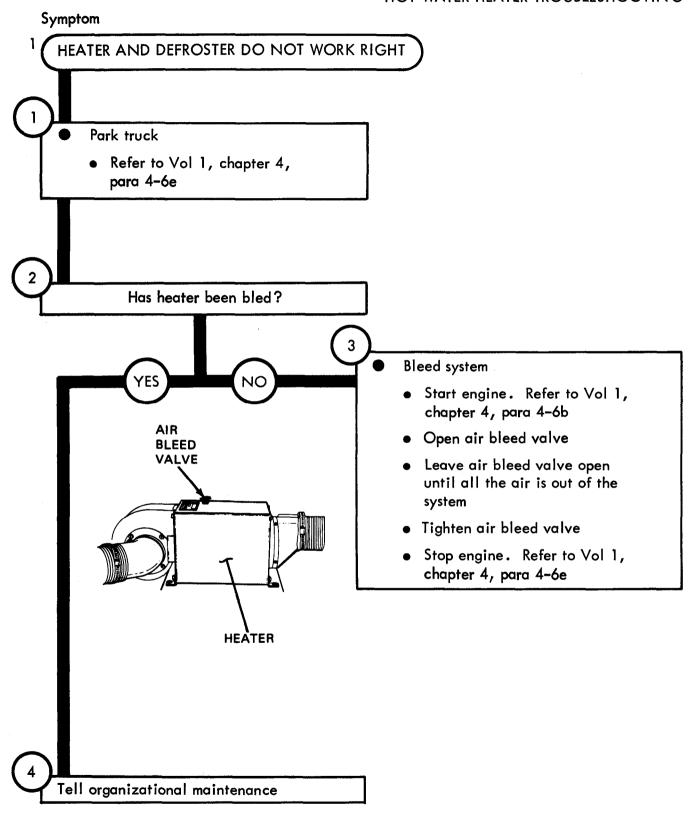

DUMP TRUCK TROUBLESHOOTING

CHAPTER 22 HOT WATER HEATER TROUBLESHOOTING PROCEDURES

- 22-1. GENERAL. Detailed troubleshooting procedures for the hot water heater are given in this chapter.
- 22-2. PROCEDURES . These troubleshooting procedures are used the same way as the sample troubleshooting procedure given in chapter 7.

HOT WATER HEATER TROUBLESHOOTING

By Order of the Secretaries of the Army and the Air Force:

E. C. MEYER

General, United States Army

Chief of Staff

Official:

J.C. PENNINGTON

Major General, United States Army

The Adjutant General

LEW ALLEN, JR., General, USAF Chief of Staff

Official:

VAN L. CRAWFORD, JR., Colonel, USAF

Director of Administration

Distribution:

To be distributed in accordance with DA Form 12-38, Operator Maintenance requirements for 2-1/2 Ton Truck Cargo, and 2-1/2 Ton Truck Van.

THE METRIC SYSTEM AND EQUIVALENTS

LINEAR MEASURE

- 1 Centimeter = 10 Millimeters = 0.01 Meters = 0.3937 Inches
- 1 Meter = 100 Centimeters = 1,000 Millimeters = 39.37 Inches
- 1 Kilo Meter = 1,000 Meters = 0.621 Miles

WEIGHTS

- 1 Gram = 0.001 Kilograms = 1,000 Milligrams = 0.035 Ounces
- 1 Kilogram = 1,000 Grams = 2.2 Lb
- 1 Metric Ton = 1,000 Kilograms = 1 Megagram = 1.1 Short Tons

LIQUID MEASURE

- 1 Milliliter = 0.001 Liters = 0.0338 Fluid Ounces
- 1 Liter = 1,000 Milliliters = 33.82 Fluid Ounces

SQUARE MEASURE

- 1 Sq Centimeter = 100 Sq Millimeters = 0.155 Sq Inches
- 1 Sq Meter = 10,000 Sq Centimeters = 10.76 Sq Feet
- 1 Sq Kilometer = 1,000,000 Sq Meters = 0.386 Sq Miles

CUBIC MEASURE

1 Cu Centimeter = 1,000 Cu Millimeters = 0.06 Cu Inches 1 Cu Meter = 1,000,000 Cu Centimeters = 35.31 Cu Feet

TEMPERATURE

 $5/9 \ (^{\circ} F - 32) = ^{\circ} C$

212° Fahrenheit is equivalent to 100° Celsius

90° Fahrenheit is equivalent to 32.2° Celsius

32° Fahrenheit is equivalent to 0° Celsius

 $9/5 \text{ C}^{\circ} + 32 = \text{F}^{\circ}$
