DEPARTMENT OF THE NAVY
Headquarters, U. S. Marine Corps
Washington, DC 20380-0001

30 June 2004

1. This Technical Manual (TM 08780B-24P), authenticated for Marine Corps use and effective upon receipt, provides repair parts and special tools list for the Logistics Vehicle System (LVS) series of vehicles, consisting of the Front Power Unit MK48/48A1, Trailer, Powered, Container Hauler MK14/14A1, Trailer, Powered, Wrecker/Recovery MK15/15A1, Trailer, Powered, Fifth Wheel, Semi-Trailer Adapter MK16/16A1 and Trailer, Powered, Dropside, Cargo with Crane MK17/17A1.
2. Submit notice of discrepancies or suggested changes on a NAVMC 10772. The NAVMC may be submitted via the Internet using website: <https://pubs.ala.usmc.mil/front.htm>, scrolling down to the NAVMC 10772 Tracking Program and following instructions provided. It may also be submitted by electronic mail to mbmatcommarlogbases@logcom.usmc.mil, or by mailing paper copy of NAVMC 10772 in an envelope addressed to: Commander, Marine Corps Systems Command, Attn: Assistant Commander Acquisition and Logistics (LOG/TP), 814 Radford Blvd, Suite 20343, Albany, Georgia, 31704-0343.
3. TM 2320-24P/14C dated 28 May 1999 is hereby superseded for Marine Corps use.

BY DIRECTION OF THE COMMANDANT OF THE MARINE CORPS

OFFICIAL

S. I. SCHULEK
Colonel, USMC
Program Manager, Motor Transport (PMM151)
Marine Corps Systems Command

ORGANIZATIONAL, DIRECT SUPPORT, AND GENERAL SUPPORT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LIST

SECTION I. INTRODUCTION

1. SCOPE. This manual lists and authorizes spares and repair parts; special tools; special Test, Measurement, and Diagnostic Equipment (TMDE); and other special support equipment required for performance of organizational, direct support, and general support maintenance of the 22 1/2 Ton, 8x8 LVS and LVSA1 series vehicles. It authorizes the requisitioning, issue, and disposition of spares, repair parts and special tools as indicated by the Source, Maintenance and Recoverability (SMR) codes.

2. GENERAL. This Repair Parts and Special Tools List (RPSTL) is divided into the following sections:

a. Section II. Repair Parts List. A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Repair parts kits are listed separately in their own functional group within Section 11. Bulk materials are listed in NSN sequence.

b. Section III. Special Tools List. A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL for the performance of maintenance.

c. Section IV. National Stock Number and Part Number Index. A list, in National Item Identification Number (NIIN) sequence, of all National Stock Numbers (NSN) appearing in the listings, followed by a list in alphanumeric sequence of all part numbers appearing in the listings. National Stock Numbers and part numbers are cross-referenced to each illustration figure and item number appearance.

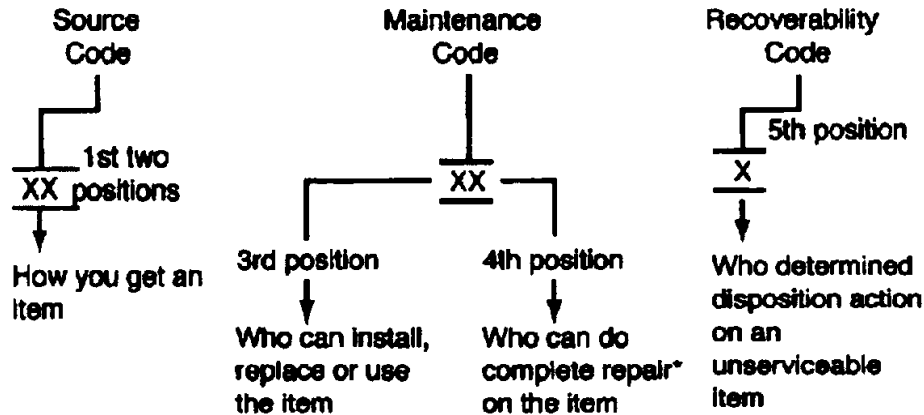

3. EXPLANATION OF COLUMNS.

a. Illustration (Column (1)). This column is divided as follows:

(1) ((a) FIG NO.) Figure Number. Indicates the figure number illustrating an exploded view of a functional group.

(2) ((b) ITEM NO.). Indicates the number used to identify items called out in the illustration.

b. SMR CODE (Column (2)). The Source, Maintenance, and Recoverability (SMR) code is a five-position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instructions, as shown in the following breakout:

*Complete Repair: Maintenance capacity, capability, and authority to perform all the corrective maintenance tasks of the 'Repair' function in a use/user environment in order to restore serviceability to a failed item.

(1) Source Code. The source code tells you how to get an item needed for maintenance, repair, or overhaul of an end item/equipment. Source codes are always the first two positions of the SMR code. Explanations of source codes follow:

Code Explanation

PA Stocked items; use applicable NSN to request/requisition items with these source codes. They are authorized to the category indicated by the code entered in the 3rd position of the SMR code.

KD Items with these codes are not to be requested/requisitioned individually. They are part of a kit which is authorized to the maintenance category indicated in the 3rd position of the SMR code. The complete kit must be requisitioned and applied.

MO- (made at Org) Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is identified by the NSN or part number in the Description column and listed in the Bulk Material group of the repair parts list in this manual. If the item is authorized to you by the 3rd position code of the SMR code, but the source code indicates it is made at a higher category, order the item from the higher category of maintenance.

MF-(Made at DS/Intermediate Forward)
MH-(Made at GS and or Intermediate Rear)
MD-(Made at Depot)

AO-(Assembled by Org) Items with these codes are not to be requested/ requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the category of maintenance indicated by the source code. If the 3rd position code of the SMR code authorizes you to re place the item, but the source code indicates it is assembled

Forward) at a higher category, order the item from the higher category of
 AH-(Assembled maintenance.
 by GS and or
 Intermediate
 Rear)
 AD-(Assembled
 by Depot)

- XA- Do not requisition an "XA"-coded item. Order its next higher assembly. (Also, refer to the NOTE below.)
- XB- If an "XB" item is not available from salvage, order it using the CAGE and part number given.
- XC- Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturers part number.
- XD- Item is not stocked. Order an "XD"-coded item through normal supply channels using the CAGE and part number given if no NSN is available.

NOTE

Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded "XA".

(2) Maintenance Code. Maintenance codes tell you the category(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR Code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance category authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following echelons of maintenance.

Code Application/Explanation

- C -Crew or operator maintenance done within organizational maintenance.
- O -Organizational echelon can remove, replace, and use the item.
- F -Direct support or intermediate forward can remove, replace, and use the item.
- H -General support or intermediate rear can remove, replace, and use the item.
- D -Depot can remove, replace, and use the item.

(b) The maintenance code entered in the fourth position tells you whether or not the item is to be repaired and identifies the lowest maintenance category with the capability to do complete repair (i.e., perform all authorized repair functions). This position will contain one of the following maintenance codes.

Code Application/Explanation

- O -Organizational echelon level is the lowest category that can do complete repair of the item.
- F -Direct support or intermediate forward is the lowest echelon that can do complete repair of the item.
- H -General support or intermediate rear is the lowest echelon that can do complete repair of the item.
- D -Depot is the lowest echelon that can do complete repair of the item.
- Z -Nonrepairable. No repair is authorized.

(3) Recoverability Code. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR Code as follows:

Code Definition

- Z -Nonrepairable item. When unserviceable, condemn and dispose of the item at the category of maintenance shown in 3rd position of SMR Code.
- O -Reparable item. When uneconomically repairable, condemn and dispose of the item at organizational level.
- F -Reparable item. When uneconomically repairable, condemn and dispose of the item at the direct support or intermediate, forward level.
- H -Reparable item. When uneconomically repairable, condemn and dispose of the item at the general support or intermediate rear level.
- D -Reparable item. When beyond lower category repair capability, return to depot. Condemnation and disposal of item not authorized below depot category.
- L -Reparable item. Condemnation and disposal not authorized below specialized repair activity.
- A -Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. National Stock Number (Column (3)). Lists the National Stock Number (NSN) assigned to the item. Use the NSN for requests/requisitions.

d. CAGE (Column (4)). The Commercial and Government Entity code (CAGE) is a 5-digit numeric code which is used to identify the manufacturer, distributor, Government agency, etc., that supplies the item.

e. Part Number (Column (5)). Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity) which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

NOTE

When you use a NSN to requisition an item, the item you receive may have a different part number from the part ordered.

- f. Description (Column (6)). This column includes the following information:
 - (1) The Federal item name and, when required, a minimum description to identify the item.
 - (2) Items that are included in kits and sets are annotated as being part of kit or set.
 - (3) Spare/repair parts that make up an assembled item are listed immediately following the assembled item line entry.
 - (4) NSN's for bulk materials are referenced in the description column in the line item entry for the item to be manufactured/ fabricated.
 - (5) When the part to be used differs between serial numbers of the same model, the effective serial numbers are shown as the last line of the description.
 - (6) The USABLE ON CODE, when applicable (see paragraph 5, Special Information).
- g. U/M (Column (7)). The Unit of Measure (U/M) indicates the measure (e. g., foot, gallon, pound) or count (e.g., each, dozen, gross) of a listed item. A two-character alpha code (e.g., FT GL, LB, EA, DZ, GR) appears in this column to indicate the measure or count.
- h. QTY INC IN UNIT (Column (8)). The Quantity Incorporated in Unit (QTY INC IN UNIT) indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, sub functional group, or an assembly.

4. EXPLANATION OF COLUMNS (SECTION IV)

- a. National Stock Number (NSN) Index.
 - (1) Stock Number Column. This column lists the NSN by National Item Identification Number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN

When using this column to locate an item, ignore the first 4 digits of the NSN. However, the complete NSN should be used when ordering items by stock number.

(2) Figure Column. This column lists the number of the figure where the item is identified/located. The figures are in numerical order in Section II and Section III.

(3) Item Column. The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

b. Part Number Index. Part numbers in this index are listed by part number in ascending alphanumeric sequence (i.e., vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order).

(1) CAGE Column. The Commercial and Government Entity code (CAGE) is a 5-digit numeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

(2) Part Number Column. Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity) which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

(3) Stock Number Column. This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and CAGE columns to the left.

(4) Figure Column. This column lists the number of the figure where the item is identified/located in Section II and III.

(5) Item Column. The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

5. SPECIAL INFORMATION.

a. The "USABLE ON CODE" title appears in the lower right corner of column (6), Description. Usable on codes are shown in the right-hand margin of the description column. Uncoded items are applicable to all models. Identification of the usable on codes used in this publication are:

Code	Used On
A3X	MODEL MK48
A5L	MODEL MK14
A5N	MODEL MK15
A5M	MODEL MK16
A5K	MODEL MK17
BOY	MODEL MK48A1
BOZ	MODEL MK14A1

B1D	MODEL MK15A1
B1G	MODEL MK16A1
B1I	MODEL MK17A1
ABS	ANY MODEL THAT IS ABS MODIFIED

b. Bulk materials required to manufacture items are listed in the Bulk Material Group of the manual. NSN's for bulk materials are also referenced in the description column of the line entry for the item to be manufactured/fabricated. Detailed manufacturing instructions for items source coded to be manufactured or fabricated are found in TM 08780B-20 and TM 08780B-34.

c. Detailed assembly instructions for items source coded to be assembled from component spare/repair parts are found in TM 08780B-20 and TM 08780B-34. Items that make up the assembly are listed immediately following the assembled item entry.

d. Line item entries for repair parts kits appear in a functional group in Section II (see table of contents).

e. Items which have the word BULK in the figure column will have an index number shown in the item number column. This index number is a cross-reference between the National Stock Number/Part Number Index and the bulk material list in Section II.

f. The publication(s) listed below pertain to the 22 1/2 Ton, 8x8 LVS and LVSA1 Series vehicles and their components:

Publication	Title
LI 2320-12/9	LUBRICATION INSTRUCTION
TM 08780B-10	OPERATOR'S MANUAL
TM 08780B-20	ORGANIZATIONAL MAINTENANCE MANUAL
TM 08780B-34	DIRECT SUPPORT AND GENERAL SUPPORT MAINTENANCE MANUAL

6. HOW TO LOCATE REPAIR PARTS.

a. When National Stock Number or Part Number Is Not Known.

(1) First. Using the table of contents, determine the functional group or subfunctional group to which the item belongs. This is necessary since figures are prepared for functional groups and subfunctional groups, and listings are divided into the same groups.

(2) Second. Find the figure covering the functional group or subfunctional group to which the item belongs.

(3) Third. Identify the item on the figure and note the item number of the item.

(4) Fourth. Refer to the Repair Parts List for the figure to find the line item entry for the item number noted on the figure.

b. When National Stock Number or Part Number Is Known.

(1) First. Using the Index of National Stock Numbers and Part Numbers, find the pertinent National Stock Number or Part Number. The NSN index is in National Item Identification Number (NIIN)* sequence. The part numbers in the Part Number index are listed in ascending alphanumeric sequence. Both indexes cross-reference you to the illustration figure and item number of the item you are looking for.

* The NIIN consists of the last 9 digits of the NSN

(2) Second. After finding the figure and item number, verify that the item is the one you're looking for, then locate the item number in the repair parts list for the figure.

7. ABBREVIATIONS.

Abbreviations	Explanation
NO.	Number
Assy	Assembly
MOD	Model
opng	opening
NIIN	National Item Identification Number (Consists of the last 9 digits of the NSN)
RPSTL	Repair Parts and Special Tools List
PT.	Point
P/N	Part Number
RH	Right Hand
LH	Left Hand
MM	Millimeter
THK	Thick
OD	Outside Diameter
ID	Inside Diameter
FT.	Foot
O/R	Outrigger
AMP	Ampere/Amperage
INT	Internal
EXT	External
